

Addendum 2 – 26 August 2021

RFQ A: Designing the future structure of the aged care workforce to inform a modern workplace relations framework and future costs of workforce for the aged care sector.

Q. With regard to the indicative timeframes provided in section 5.5, you have provided a clear suggested order of activities for each month. Can we be flexible with the order or timing of those activities as long as we stay within the proposed 8-month period?

A. The order of activities is sequential. Therefore, it is assumed that the activities will take place in this order without deviation. However, the timing of the activities is indicative and may be adjusted as necessary within the eight-month timeframe.

Q. With regard to the structure, job families and roles to be included, does the scope of this work include enabling functions e.g. back office or corporate functions?

A. Yes, the RFQ outlines the requirement to include both direct care roles and ancillary roles.
